

SCREAMER

The 3-Series Screamer is the beloved JHS Tube Screamer “Strong Mod”, but in a brand-new \$99 pedal. This pedal represents years of Josh playing around with the legendary Tube Screamer circuit and wanting to offer those changes in an affordable package. You will find more clean headroom, better usability as a boost, more versatile drive and tone controls as well as a more pleasing frequency response. This may be the most well-balanced Tube Screamer on earth, but that’s for you to decide.

CONTROLS

VOLUME - Controls the overall volume of the pedal. Left is less, right is more. Tons of volume on tap.

TOPE - Controls the overall brightness of the tone. Left is darker, right is brighter.

DRIVE - Controls the amount of drive/gain. Left is less, right is more.

+/- - Toggle changes the clipping. Up is asymmetrical clipping (which is the strong mod clipping). Down is symmetrical clipping (stock TS9 TS808 style).

JACKS

INPUT - 1/4” jack on the right side of the pedal.

OUTPUT - 1/4” jack on the left side of the pedal.

POWER - Requires 9V DC negative center power and consumes 12mA. Do not use more than 9V DC. You will void your warranty.
