

HOW DOES IT WORK?

Volume - Controls the output volume.

Gain - Controls the amount of gain in the circuit.

Tone - A typical tone control. Straight up is flat. To the left darkens your tone, and to the right brightens it.

Presence - A presence cut control that allows you to dial in the high end. To the left is brighter; to the right is darker.

Clip - A three-way switch with loads of different voices. Flip it down for lower gain, more open sounds; up for higher gain, more compressed sounds; and in the middle to life the diodes for very open, uncompressed sounds.

POWER REQUIREMENTS

9V Center Negative - Using anything else will ruin your pedal and void the warranty. Consumes 44mA.

WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trimpots voids the warranty.
