

# WESTMINSTER EFFECTS AUGSBURG DELUXE AMP SIM

## HOW DOES IT WORK?

**Volume** - Controls the output volume.

**Gain** - Controls the amount of distortion in the circuit, turn it to the left to clean up your tone.

**Presence** - Dials in that glassy sparkle.

**Treble** - A straightforward treble control: To the right boosts treble; to the left cuts.

**Bass** - A straightforward bass control: To the right boosts bass; to the left cuts.

**Cab Sim** - If using as a DI, flip up the switch to engage the speaker simulation.

**Dry Thru** - Bypasses the Augsburg's circuit on the 1/4" output.

**Bright** - Increases the clarity and chime.

**The switch on the side?** - This is a ground lift switch. If you have a hum from a ground loop, flip the switch up/away from you.

## POWER REQUIREMENTS

**9V Center Negative** - Using anything else will ruin your pedal and void the warranty. Consumes 16mA.

## WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trimpots voids the warranty.
