

# WESTMINSTER EFFECTS ZWINGLI SDD-3K PREAMP

---

## HOW DOES IT WORK?

**Volume** - Controls the output volume. The Zwingli can get *very* loud, so be careful here.

**Pre** - Attenuates the signal before the op-amp gain stage.

**Post** - Attenuates the signal after the op-amp gain stage. Both the Pre and Post controls were switches on the original Korg SDD-3000 rackmount delays. We decided to use pots for more versatility and control.

## POWER REQUIREMENTS

**9V Center Negative** - Using anything else will ruin your pedal and void the warranty. Consumes 64mA.

## WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trim pots voids the warranty.
