

FS-P3S

Specifications

Size: 11.0 (W) x 5.9 (D) x 5.8 (H) cm including protrusions

Weight: 366g

Attached cable: 3m

The One Control FS-P3S is a footswitch that can be directly connected to the BJF-S series amplifiers. The FS-P3S uses the included CAT5 style cable and connects to the footswitch terminal on the rear panel of the BJF-S series amplifiers.

You can control the effect loops, switch the channel of the amplifier, and bring in the effect at your feet easily. The current settings are easy to see at a glance with the three LED lights of the FS-P3S, and do not require connecting a separate power supply.

The new smaller format of the FS-P3S works well with many smaller boards, while the previous FS-P3 model has a longer yet narrower format. Each of these units will work with either of the BJF-S series amplifiers.
