

U2 GUITAR WIRELESS TRANSMITTER HOLDER

FEATURES:

- ✧ The U2 Transmitter Holder is a high quality case for a wireless transmitter and can be used to attach the transmitter to the guitar strap.
- ✧ The size of the holder perfectly fits the U2 Guitar Wireless Transmitter.
- ✧ The holder is attached to the strap with elastic bands and hook-and-loop fasteners. It is designed to firmly hold the transmitter in place.
- ✧ HOLDER ONLY. Guitar strap and wireless transmitter not included.

SOLVING PROBLEMS:

- ✧ The holder is firmly attached to the guitar strap to prevent the transmitter from coming loose or getting bumped.
- ✧ It can be used for guitars with special jack positions where the U2 transmitter cannot be plugged in directly.
- ✧ It can be used to provide distance between the wireless transmitter and the electronics of guitars with preamp circuits or acoustic guitars with microphone pickups, which could cause interference with the transmitter plugged in directly.

HOW TO USE

Package includes:
1 x holder, 1 x cable

Attach the cable
to the holder.

Put the U2 Transmitter
into the holder.

Use the hook-and-loop closure
of the holder to attach it to the
strap buckle.

Close the hook-and-loop strips
on the back side of the strap to
fix the holder in place.

Connect your guitar.
