

ABSOLUTE DESTRUCTION

This is the master volume control for the effect.

← OVERLOAD

Sliding this control further left destroys the sound more and more. Try different combinations of GAIN and OVERLOAD for a wild range of sounds.

GAIN →

Controls the gain of the circuit. The circuit has an extreme range and can create noise and static as the gain slider is moved.

This pedal operates on a 9V negative tip / positive ring 2.1mm power adaptor or with a 9V battery. When using a 9V battery disconnect the input when not using to save battery life.
