

ROSS guitar pedals are backed by a one (1) year warranty from the date of purchase. We warrant this product to be free from defects in material and workmanship under normal use. This warranty is limited to the original purchaser and is not transferable. This warranty does not cover loss/theft, damage, caused by misuse, modification, abuse, accident, natural disaster, or unauthorized repair. For full warranty details and service please visit RossElectronics.com.

FULL WARRANTY

The logo for the brand ROSS, featuring the letters 'ROSS' in a bold, serif font. To the right of the letters are three curved, parallel lines that sweep upwards and to the right, resembling a stylized signature or a musical flourish. A small trademark symbol (TM) is located at the bottom right of the logo.

LICENSED, MANUFACTURED, AND SOLD BY JHS PEDALS

*Electronic sound effects, precision engineered,
hand assembled and individually tested to assure
maximum performance, and reliability.*

CHORUS

The ROSS Chorus is a true-analog, bucket-brigade chorus utilizing a V3207 chipset. While this pedal excels at the vintage bucket-brigade chorus and vibrato tones you've heard for decades, these straightforward controls can also create a wide range of textures and are versatile enough for any music style.

CONTROLS

"Rate" controls the speed of the LFO (left is slower, right is faster). "Depth" controls the depth, or perceived mix of the chorus effect (left is less, right is more). The side switch toggles between two modes: Chorus and Vibrato (reminiscent of effect pedals like the BOSS VB-2). The footswitch activates the pedal via soft touch bypass switching. The status LED indicates the circuit is active.

JACKS

The ¼" input and output jacks connect to your guitar and amplifier. The power jack accepts standard 9V DC Negative Center power and consumes 47mA.
