

STEP 1

With your RockBoard® Hook & Loop Cable Tie in hand, and make a loop, with the soft surface facing inwards.

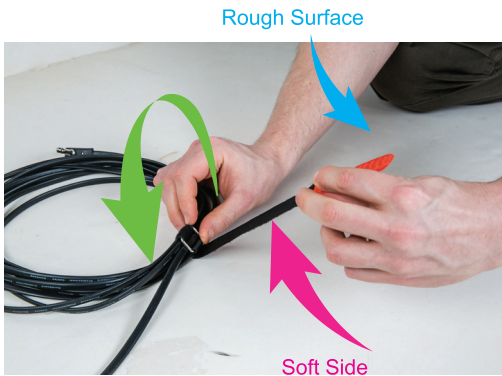

STEP 2

Pull the rough surfaced tip through the metal ring at the end of the cable tie.

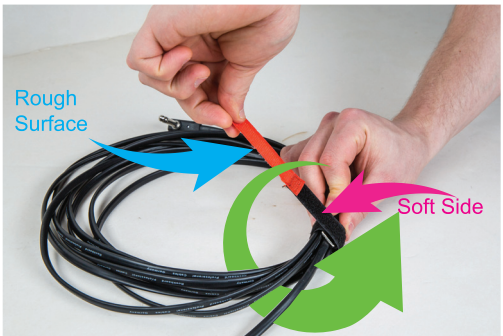

STEP 3

Put the resulting loop around the cable or cable bundle and pull it tight.

STEP 4

Wrap the remaining part of the cable tie tightly around the entire rolled up cable with the soft part facing outside.

STEP 5

Fix the rough surfaced flap on the soft portion to secure the cable tie.

STEP 6

Repeat Steps 1-5 on all your loose cables, so all are bundled up neatly!
