

### HOW DOES IT WORK?

**Listen, Friend** - Controls the output volume.

**Wealth** - Controls the amount of gain in the circuit.

**Health** - A typical tone control. Straight up is flat. To the left darkens your tone, and to the right brightens it.

**Clip** - A three-way switch with loads of different voices. Flip it down for warmer, up for a tighter, punchier sound, or put it in the middle to split the difference.

### POWER REQUIREMENTS

**9V Center Negative** - Using anything else will ruin your pedal and void the warranty. Consumes 49mA.

### WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trim pots voids the warranty.
