RockBoard® LED Light
Manual

Introduction
Thank you for purchasing the RockBoard® LED Light - Pedalboard Illumination.

This simple to use LED light for your RockBoard® pedalboard illuminates your effects setup in 6 flashy colors and offers 4 brightness levels. It will put a stop to tap dancing on your effects in the dark once and for all and provides subtle ambient illumination.

This LED light has been specifically designed for use with RockBoard® pedalboards. Immediately compatible with all 2019 Series RockBoard® pedalboards, its simple 3-hole mounting clamp can be fixed to virtually any pedalboard to illuminate your effects rig on dark stages and put them into the limelight.

Precautions
Power Supply
Please connect the designated DC input cable to an 9V DC output on your multi-power supply. Please be sure to use only a power slot which supplies 9V DC (-) center power. Higher voltage input or wrong polarity may irreparably damage the LED Light and void the warranty. Unplug the AC power adapter from your multi-power supply when not in use or during electrical storms.

Important note: The RockBoard® LED Light uses a digital micro controller for controlling color and brightness of the LEDs. This may cause interference to sensitive analog circuitry. To prevent noise interference, we suggest connecting the power plug to a transformer isolated power slot on yout multi-power supply.

Connections
Always turn off the power to the device as well as all other equipment before connecting or disconnecting. This will help to prevent malfunction and damage to any of the devices used. To avoid deformation, discoloration, or other serious damage, do not expose this unit to any of the following conditions:

- Direct sunlight
- Strong magnetic fields
- Excessively dusty or dirty environments
- Strong vibration or shock
- Heat sources
- Extreme temperature
- High humidity or moisture

Interference with other electrical devices
Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.
Cleaning
Clean only with a soft, dry cloth.

Handling
Do not apply excessive force to the switches or controls. Do not let paper, metal, dirt or other objects come into the device or its connections. Take care not to drop the device and do not subject it to shock or excessive pressure.

Main Features
- multi-color LED Light for RockBoard® pedalboards
- 6 colors selectable (white / red / green / blue / yellow / pink)
- brightness adjustable in 4-steps (100% / 75% / 50% / 25% / off)
- power supply via optional 9V DC power supply, 2.1 x 5.5 mm barrel plug, polarity (-) center

Switches

Color Switch

Power/ Brightness Switch

- **Power / Brightness Switch:** This button will turn on the LED light to the brightest setting, repeated pressing of this button will cycle through the 4 brightness settings (100% / 75% / 50% / 25%). Pressing the button 5 times will turn of the light.
- **Color Switch:** This button cycles through the 6 selectable colors (white / red / green / blue / yellow / pink).

Mounting
For mounting your RockBoard® pedalboard, there are prepared openings in the side of your RockBoard®. The RockBoard® DUO 2.0, DUO 2.1, TRES 3.1 and QUAD 4.1 pedalboards feature one set of mounting holes on the right side. On RockBoard® Pedalboards QUAD 4.2, CINQUE 5.2, CINQUE 5.3 and CINQUE 5.4 there are mounting holes on either side of the pedalboard.

Use the included mounting screws, nuts and wrench for mounting the RockBoard® LED Light tightly to the side of your pedalboard. Run its power cable through the large mounting opening, so it does not protrude from the side of your board.

Specifications
- **LEDs:** 16 x tri color
- **Colors:** white / red / green / blue / yellow / pink
- **Power requirements:** 9V DC (-) center
- **Power connector:** 2.1 x 5.5 mm barrel plug
- **Current draw:** less than 100 mA
- **Dimensions:** (W x H x D incl. mounting clamp) 225 x 230 x 25 mm / 8 $^7/_8$" x 9 $^1/_{16}$" x 1"
- **Weight:** 150 g
