MusicNomad Launches the Grip One and Humitar One

PRESS RELEASE

September 22, 2022

Music Nomad introduces a patent pending Grip One, alongside the Humitar One, an all-in-one humidifier and hygrometer.

No feature is overlooked, starting with the precision bearing design they invented in 2016 that makes turning the handle effortless, silent & super fast. The innovative rubber-lined head smoothly & silently slips over your tuning pegs for a scratch-free & clank-free operation compared to traditional plastic peg winders. The contoured head design fits virtually all tuning pegs both big & small, & its narrow profile keeps you from hitting close-fitted pegs on electric guitars. The ergonomic & non-slip rubber grip handle gives you total control & comfort. Cutting strings is a cinch! Whether big or small, use the high-quality carbon steel String Cutter to effortlessly cut through all string types. Ready to pull pins? The Bridge PinPuller's innovative universal design allows you to pull acoustic guitar bridge pins easily. Simply slide under the pin & pull

straight up. Grip One is perfect for electric & acoustic guitar, bass, banjo, mandolin, ukulele & orchestral strings. Don't lose it or loan it, you'll look forward to the next time you change your strings.

MusicNomad has developed an easy-to-use, no mess, low maintenance guitar humidifier and a humidity and temperature monitor that is simple, accurate, and reliable. The Humitar One safely releases moisture evenly to eliminate potential problems such as warping, shrinking and, worse yet, cracking. The Humid-i-Bar reusable sponge holds a lot more water than the competition. This means less monitoring on your end while, resting assured, your fine guitar is cared for.

To ensure your guitar is in the safe zone, the Humitar One accurate sensor monitors your string instrument's environment every 20 seconds and gives you the humidity and temperature readings on its LCD display. It also gives you the maximum and minimum range over the period you are measuring and can be reset at any time. The Humitar One comes with many cool features such as a reminder of the humidity and temperature safe zone at which you want to keep your string instrument, a long-lasting AG 13 battery, and Fahrenheit or Celsius readings.

Grip One: Available October 24, 2022 - Suggested Retail \$16.99 - \$19.99 USD

Humitar One: Available October 24, 2022 - Suggested Retail \$29.99 - \$34.99 USD
