

Sadowsky Onboard Electronics

Compatibility:

This electronics assembly is compatible with the following Sadowsky MetroExpress models:

- Sadowsky MetroExpress 21-Fret Hybrid P/J Style Bass
- Sadowsky MetroExpress 21-Fret Vintage J/J Style Bass
- Sadowsky MetroExpress 22-Fret Will Lee Artist Line Bass
- Sadowsky MetroExpress 24-Fret Vintage J/J Style Bass

The controls are: Volume, Balance, Treble and Bass. Push/Pull on the Bass knob for preamp bypass.

Installation requires a side jack and a battery compartment. If not already done, we recommend shielding the control cavity and pickup cavities at the time of installation. We highly recommend installation by a professional guitar technician or luthier if routing and drilling is required for a battery compartment and/or side jack.

This system is not compatible with EMG or any other active pickups requiring anything other than a 250K or 500K volume pot. For these applications, please custom order a parts-only preamp kit and use your original volume pot.

Turn the balance (pan) control counterclockwise to select the neck pickup and clockwise to select the bridge pickup. There is no right or wrong preference for the direction of the balance control knob, you can swap the pickup connections on the balance control to change the direction. If you do this, you will also need to switch the two pickup inputs on the potentiometer.
