

ROSS guitar pedals are backed by a one (1) year warranty from the date of purchase. We warrant this product to be free from defects in material and workmanship under normal use. This warranty is limited to the original purchaser and is not transferable. This warranty does not cover loss/theft, damage, caused by misuse, modification, abuse, accident, natural disaster, or unauthorized repair. For full warranty details and service please visit RossElectronics.com.

FULL WARRANTY

The logo features the word "ROSS" in a large, bold, serif font. To the right of the letters "O" and "S" are two stylized, curved lines that sweep upwards and to the right, resembling a signature or a musical flourish. A small trademark symbol (TM) is located at the bottom right of the logo.

LICENSED, MANUFACTURED, AND SOLD BY JHS PEDALS

*Electronic sound effects, precision engineered,
hand assembled and individually tested to assure
maximum performance, and reliability.*

COMPRESSOR

The ROSS Compressor is an OTA-based, vintage style compressor. This pedal is a faithful reproduction of the coveted "Era 2" Gray Box ROSS Compressor circuit, possibly the most legendary compressor of its kind.

CONTROLS

"Level" controls volume (right is louder, left is quieter). "Sustain" controls the amount of compression/sustain from the circuit (right is more compressed/sustained, left is less compressed/sustained). When activated, the side switch toggles between two modes: Vintage and Bright. Bright mode helps your guitar cut through the mix when you need a little extra clarity for darker pickups or amplifiers. The footswitch activates the pedal via soft touch bypass switching. The status LED indicates the circuit is active.

JACKS

The ¼" input and output jacks connect to your guitar and amplifier. The power jack accepts standard 9V DC Negative Center power and consumes 37mA.
